

# Help Shape the Future of the Tide To Town Trail

Please come join a community forum about the future development of the Savannah's Tide To Town Trail. A key focus of the meeting will be ensuring the trail's development results in economic, social, and recreational justice for the culturally rich, yet economically low-wealth communities along the trail.

The City of Savannah is organizing the community forums at three locations to make it more convenient for local residents, community organizations representatives, and businesspeople to share their views. There will also be a virtual meeting for those who are not able to participate in-person.
